The specific part of amount received against Bottles of **HEALTH GUARD** is to provide clean Water also to the poor community. Let's shake hands to serve humanity.
- Complete Water Purification with Sustainable Economic & Environmental Advantage.

Company

HEALTH GUARD is a water purification technologies firm and knowledge based Company that is providing Chemical Free Water Purification System solutions recently in Pakistan.

The credibility of our products is established by solving difficult water challenges. However, our basic business discipline continues to this day with a proven track record of solving water purification problems effectively, with robustness and durability, typically at a lower cost and smaller footprint.

Why to choose HEALTH GUARD Water for Drinking?

- Our Production area is situated near canal Bank, Green lands and water is produced in agricultural and cultivated zone in a clean and unpolluted atmosphere, our environment is fit for producing water fit for health.
- **Heath Guard** Company is registered from IPO (intellectual property organization) Pakistan.
- We are certified by PCRWR (Pakistan Council of Research in Water Resources).
- **Health Guard** Water is Licensed and supervised by PFA (Punjab Food Authority) maintaining Pakistan standards under super vision of PSQCA (Pakistan standard Quality control authority).
- We are also the member of LCCI (Lahore chamber of commerce & industry).
- **Health Guard** is a tax payer company registered with FBR (Federal Board of Revenue).
- All material we are using is Food Grade material. Now, ALHAMDULILLAH our product is successful to achieve international standards of export quality.

Why Treat Water When You Can Purify?

Treatment modifies the problem. Purification removes the problem.

Treatment involves chemical addition to the water with unknown or unacknowledged health impacts (e.g. chemical stabilizers). In this types of treatment, contaminants (or added contaminants) and pathogens remain in the water. The alternative, Purification, removes the problem! Health Guard is seriously working on this issue to aware people about this fact that purification is better than treatment.

Purification Capability

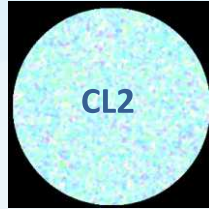

HEALTH GUARD has developed the most comprehensive Chemical Free Water Purification Process. Our unique technology innovations combine the best of Fifth Generation Ceramic Ultra-Filtration Membrane Technology. We provide purified water to our valuable customers after certain cleaning and purification systems. Firstly our bottle is chemically washed for elimination of bacteria which can cause diseases injurious to health. Secondly some significant minerals are added in water for making our drinking water premium and refreshing.

Mineral Content (mg/L)

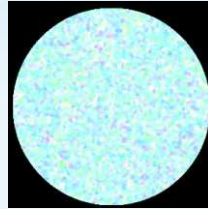

Magnesium	4-24	Potassium	0.02-2
Sodium	5-10	Chloride	77-150
Sulphate	12-27	Fluoride	0.02-0.38
Calcium	40-70	pH	6.5-7.21
Total Minerals			150-250

How much water do you need?

Every day you lose water through your breath, perspiration, urine and bowel movements. For your body to function properly, you must replenish its water supply by consuming beverages and foods that contain water.

So how much fluid does the average, healthy adult living in a temperate climate need?

About 15.5 cups (3.7 liters) of fluids for men

About 11.5 cups (2.7 liters) of fluids a day for women

These recommendations cover fluids from water, other beverages and food. About 20 percent of daily fluid intake usually comes from food and the rest from drinks.

What about the advice to drink 8 glasses a day?

You've probably heard the advice, "Drink eight 8-ounce glasses of water a day." That's easy to remember, and **it's a reasonable goal.**

Most healthy people can stay hydrated by drinking water and other fluids whenever they feel thirsty. For some people, fewer than eight glasses a day might be enough. But other people might need more.

البتہ 85 فیصد امراض مثلاً پیپٹائٹس، ٹائیفائیڈ پچش اور امراض گردہ کی بنیادی وجہ بھی آلودہ پانی ہی ہے۔

WHO کے ایک حالیہ جائزے کے مطابق

پاکستان میں 40 فیصد اموات کی بنیادی وجہ آلودہ پانی سے پیدا ہونے والی بیماری ہیں۔
250,000 (اڑھائی لاکھ) بچے سالانہ ڈائیریا اور پانی سے پیدا ہونے والی دیگر بیماریوں کی وجہ سے موت کے منہ میں چلے جاتے ہیں۔

ہسپتالوں میں داخل مریضوں کی 65 فیصد تعداد آلودہ پانی کی متعلقہ بیماریوں میں مبتلا ہے جبکہ یہ اعداد و شمار صرف سرکاری ہسپتالوں سے لئے گئے ہیں۔

◀ **کیونکہ** پاکستان میں ہر قسم کے پانی میں جراثیم پائے جاتے ہیں چاہے نلکے کا ہو، کنویں کا یا 300 فٹ سے کم گہرائی والے ٹیوب ویل کا جبکہ سیوریج ملا پانی اور فرسودہ پائپ ایک الگ المیہ ہے۔
◀ **جبکہ** صاف پانی کے حصول کے تمام ذرائع عام آدمی کی پہنچ سے باہر ہیں اور اکثر کمپنیوں کی کوالٹی بھی زیر تنقید رہتی ہے۔

◀ **فلٹرز** منگے اور مشکل دیکھ بھال (Maintenance) کے باوجود اکثر اقسام وائرس ختم کرنے کی صلاحیت سے محروم ہیں۔

◀ **آسان حل** ہیلتھ گارڈ واٹر کا استعمال ان تمام مسائل کا حل اور صحت کی ضمانت ہے کیونکہ یہ جدید ترین امپورٹڈ ٹیکنالوجی سے ایکسپورٹ کوالٹی اور انٹرنیشنل سٹینڈرڈز پر پراسیس کر کے آپ تک پہنچایا جا رہا ہے۔
جوڈاکٹرز سے تصدیق شدہ ہے۔
